Table of Contents

1. Getting started
 - 1.1 Requirements
 - 1.2 Installation
2. Interface
 - 2.1 Overview
 - 2.2 Shortcuts
3. Graphing
 - 3.1 Creating Graphs
 - 3.2 Examples
4. Algorithms
 - 4.1 Default Algorithms
 - 4.2 Importing New Algorithms
 - 4.3 Creating Custom Algorithms
5. Index

1 Getting Started

1.1 Requirements

The requirements for being able to use the program. A list of specifications and the icons for the compatible platforms.

1.2 Installation

Instructions for installing and starting the program, with pictures to guide the user. Installation method still to be determined.

2 Interface

2.1 Overview

An overview of the program and a laydown of the functionality of the user interface. Review where each functionality is placed and provide pictures of all UI elements.

2.2 Shortcuts

The requirements for being able to use the program. A list of specifications and the icons for the compatible platforms.

3 Graphing

3.1 Creating Graphs

Show the user how to create graphs using the software and explain what constitutes a correct graph.

3.2 Examples

Give some examples of graphs that the user can create, explain specific functionalities using these examples.

4 Algorithms

4.1 Default Algorithms

Explain what default algorithms are provided with the software and explain their functionality within the software. Explain how to use the algorithm and what is expected to happen.

4.2 Importing New Algorithms

Show the user how to import new custom algorithms.

4.3 Creating Custom Algorithms

Explain to the user how custom algorithms should be formatted.
